

SUMMER HACKATHON 2026 · OPEN INNOVATION

GovGPT

AI that files RTI applications
for every Indian. In 60 seconds.

Team DLC · Delhi University · 1st Year B.Sc. (Hons.) Physical Science with CS

17.5L+

RTI apps
filed 2023–24

88%

Indians with no
RTI awareness

₹7.67L Cr

Unclaimed govt
scheme funds

The RTI system locks citizens out.

01

Nobody knows RTI exists

12% rural awareness

Lokniti-CSDS Survey

88% of rural Indians — over 70 crore people — have never heard of RTI. They suffer in silence without knowing they have a legal right to demand answers.

02

Wrong department →
rejected

900+ public authorities

RTI Act 2005

India has 900+ public authorities. One wrong address = automatic rejection. There is no free guide helping citizens identify the correct ministry.

03

Legal format is a minefield

Section 8(1) used 28,924×

CIC Annual Report 2024-25

RTI Act 2005 requires Section 6 legal format, precise subject lines, and fee declarations. Without legal literacy, your application fails before it's read.

04

Portals are English-only

80 Cr Indians need govt help

Census + DBT 2024

RTIOnline.gov.in is entirely in English. India's rural majority speaks Hindi, Tamil, Telugu, and Bengali. The system systematically excludes who needs it most.

And it gets worse.

29,000+

RTI appeals pending at CIC today

Even if you file correctly, your appeal piles up. Average wait for a second appeal hearing: over 1 year. Citizens give up.

Source: Rajya Sabha reply, March 2026

4 years

Jharkhand's Info. Commission was defunct

4 lakh+ citizens in Jharkhand had no RTI recourse for 4 full years. State commissions across India are plagued by vacancies.

Source: PWOnlyIAS Analysis, 2024

Only 4%

of PIOs penalised in 8 years (2015–2023)

Officers ignore RTI deadlines with zero consequences. In Tamil Nadu, only 21 penalties in 14,000 cases in 2024.

Source: Down To Earth, Oct 2025

₹7.67L Cr

govt scheme budget — mostly unclaimed

500+ central schemes. Most farmers, widows, students have never heard of the schemes they qualify for. Money sits unused.

Source: Union Budget 2024-25

India's 1.4 billion citizens have a legal right to information — but no accessible tool to exercise it. GovGPT fixes that.

GovGPT

Type or speak your problem
in Hindi or English.
Get a legal RTI in 60 seconds.

CORE FEATURE

RTI Generator

Describe your problem in plain Hindi or English. GovGPT identifies the correct public authority from 900+ options, writes a complete Section 6-compliant RTI application, and generates a PDF ready to mail — in under 60 seconds.

Correct dept + legal format + PDF — 60 sec

RAG POWERED

Scheme Eligibility

Ask 'Am I eligible for PM Kisan?' — GovGPT searches 50+ real government scheme documents stored locally in ChromaDB. Retrieves exact eligibility criteria and answers accurately. No hallucinations. Grounded in real data.

Real govt documents — zero hallucinations

BUILT INTO CHROME

Hindi Voice Input

Tap the mic, speak in Hindi. Chrome's Web Speech API transcribes instantly — no extra library, no cost, zero setup. Makes GovGPT usable by people who cannot type English — which is the majority of India.

20 lines of JS — reaches 70 crore rural Indians

From problem to legal RTI in 60 seconds.

1

User types or speaks

Opens GovGPT in Chrome. Types problem in the text box in Hindi or English — or taps 🗣️ and speaks in Hindi. Web Speech API converts voice to text instantly. No typing skill required.

2

Flask API receives it

JavaScript sends a POST request to our Python Flask backend on port 5000. Flask validates the input, detects the language, and passes the message to the LangChain pipeline.

3

RAG searches ChromaDB

LangChain queries 50+ govt scheme documents stored in ChromaDB. Converts the query to vectors via Gemini Embeddings, retrieves the top-3 most relevant scheme docs as context.

4

Gemini 1.5 Pro generates

LangChain sends: System Prompt (RTI Act format) + retrieved context + user's problem → Gemini writes a complete, legally formatted RTI with correct department, Section 6 reference, and fee declaration.

5

Streams word by word

Flask sends each word token via Server-Sent Events (SSE) as it arrives from Gemini. JS EventSource appends each word live — exactly like ChatGPT. Judges stop scrolling.

6

Download PDF + Share

User clicks Download — jsPDF reads the RTI text and creates a formatted A4 PDF with all legal sections. WhatsApp share sends a pre-filled message. One tap. RTI in their hands.

Simple languages. Real engineering.

FRONTEND	BACKEND	AI / DATA LAYER
HTML5 + CSS3 + JS No React. No TypeScript. Just what you know.	Python + Flask REST API. Lightweight. You already know Python.	RAG Pipeline Retrieve → Augment → Generate. Not a basic chatbot.
Web Speech API Hindi voice — built into Chrome. Zero cost. 20 lines.	LangChain Manages prompts, memory, RAG chain. pip install.	50+ .txt scheme files One file per scheme. Plain text. P4's job.
Server-Sent Events Word-by-word streaming. ChatGPT-style. Pure JS.	ChromaDB Local vector DB — runs on your laptop. No cloud.	Gemini Embeddings Converts text to searchable vectors for ChromaDB.
jsPDF (CDN link) PDF export in browser. One script tag. No install.	Gemini 1.5 Pro API Free tier on Google AI Studio. Best Hindi support.	ConversationMemory LangChain buffer — AI remembers full conversation.
fetch() API Calls Flask backend. Basic JS. Clean and reliable.	python-dotenv API key safely in .env file. Never hardcoded.	Prompt Engineering RTI Act 2005 Section 6 format lives in the prompt.

What other teams won't have.

RAG — not guessing

Most hackathon AI teams send a raw prompt to GPT and print what comes back. We retrieve real government scheme data from ChromaDB before answering. Judges who understand AI will immediately recognise this as production-grade design.

Streaming

Word-by-word output, ChatGPT-style. 15 extra lines of code using Flask SSE + JS EventSource. In a room where 800 projects show a loading spinner and dump text — ours types live. Judges subconsciously trust products that feel real.

Hindi voice

Chrome's Web Speech API. 20 lines of JS. Zero rupees. At a national hackathon of 800 teams, we are almost certainly the only project with Hindi voice input — making our accessibility and impact story completely undeniable.

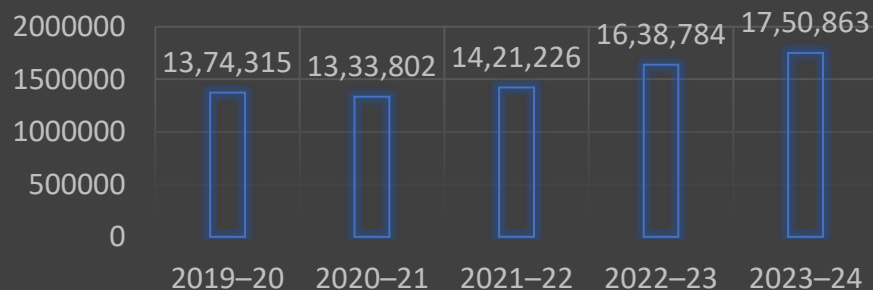

PDF output

A judge can literally download our RTI and mail it to a real government office tomorrow. Working, tangible output beats dashboards and charts every time. It makes GovGPT feel complete, shipped, and real — not a student prototype.

Real problems. Real people. Real solution.

RTI apps filed per year — CIC Annual Report 2024-25

**3.2 Cr**

RTIs since 2005

12%

500+

Central schemes

29K+

Pending appeals

Who can GovGPT

Ram Prasad, Farmer — Bihar

Ration card not updated for 3 months. Types in Hindi. GovGPT finds Food Corp of India, drafts RTI in 45 seconds. Ram hands the PDF to the block office.

Priya, Student — Delhi

Scholarship delayed 6 months. GovGPT checks PM Scholarship criteria from our database, drafts RTI to Ministry of Education. Done in under a minute.

Kamla Devi, Widow — Rajasthan

Pension stopped suddenly. Speaks Hindi via voice input. GovGPT identifies Social Welfare Dept, writes Section 6-compliant RTI. One click. Filed.
